### JAMIE RUSSELL | 2.00pm - 2.45pm

#### Let's talk about the weather

Jamie has had a keen interest in meteorology and astronomy since childhood and has captured some fascinating images of The Milky Way, Comet Hale Bopp and spectacular night time Thunderstorms. He has visited many unknown IOW locations to try and capture something interesting and unique, and being a true Islander his knowledge of the Island is still second to none.

It all started back in 1997 when he photographed his first comet using a simple film SLR camera, this started a passion for Astrophotography which naturally progressed into Weather, Lightning and finally Landscape photography.

### CHRIS CORNFORD | 2.45pm - 3.30pm

#### Capturing Island Life

Working as the photographer for Observer Chris captures all aspects of Island Life, a chance to hear Chris share his experiences and stories of capturing Island Life.

My photography journey started around age six when I borrowed my brother's 120mm bellows film camera and, unbeknownst to him, used up a whole reel of newly loaded film taking pictures of anything and everything. Unfortunately the results were not great – but as a six year old, I considered myself as a new David Bailey! Progress was made through the years – and my subject matter has ranged from landscapes and wildlife to journalism photography.

Stephen Oakes-Monger shares the stories behind the images in his new orchid guide, exploring the arts and patience of photographing wild orchids in their natural habitats. From windswept downs to shaded woods he reflects on the moments that only a lifetime of observation can bring.

Stephen has spent nearly twenty years documenting and protecting the Orchids of the Isle of Wight and a further thirty years tracking down most of the British Orchid species. Stephen brings together expertise, activism and artistry in his work.

## INTRODUCING OUR NEW ALE

A traditional Benedict style Ale  
brewed with Isle of Wight honey

## Apiary Ale

A lighter pale ale with delicate  
honey aromas and subtle sweetness,  
intertwined with traditional  
abbey yeast character

Originally founded in 1132, Quarr Abbey is home to a community of Benedictine monks. The Benedictine way of life is one of devotion to prayer, work & hospitality. The Abbey grounds are cultivated by monks to grow a bountiful supply of fresh food for their own sustenance and to share with the local community. Abbey Beers have been brewed by monks for centuries utilising locally grown herbs, malt and barley. Apiary Ale is inspired by the 'Singel' beers that were brewed by monks often for their own tables as they were lighter in alcohol and incorporates Isle of Wight honey lending a delicate aroma and slightly sweet flavour.
