and Saturday 10.30am - 2.30pm.

## OVERVIEW:

If you have always wanted to see the Isle of Wight on two wheels but don't feel you can here is a great solution. Squirrel around on an Electric Bike. With its hilly terrain, the Isle of Wight can be challenging for some riders but with a Red Squirrel Bike you will be able to go where others have gone before. They make cycling the Island easy for all abilities – try one today!

The Red Squirrel Bikes are fitted with a small battery-powered electric motor, which gives you a subtle power boost when riding along. This extra boost makes riding in to wind feel like a gentle breeze or up steep hills like a gentle slope.

It allows you to cover much more ground than you might be able

to on conventional bicycle, giving you more time to explore this wonderful Island! A full charge should last 60 miles so why not ride on the popular Red Squirrel route stopping off for a cake along the way. Or for the more adventurous the electric power can take you up to the Needles and look back at the coloured sands of Alum Bay.

The Red Squirrel bike ensures you can go a little further, take it a little easier or even go a little faster perfect for the Isle of Wight Terrain. You will get the electric smile and will arrive feeling energised and like you haven't even cycled!

So grab a picnic and have a fun day out [www.nutsnotto.co.uk](http://www.nutsnotto.co.uk)
